# Checking available product offerings and catalogues

All the available (Launched) offerings appear in the *Search* page of the website, so they can be seen by customers.

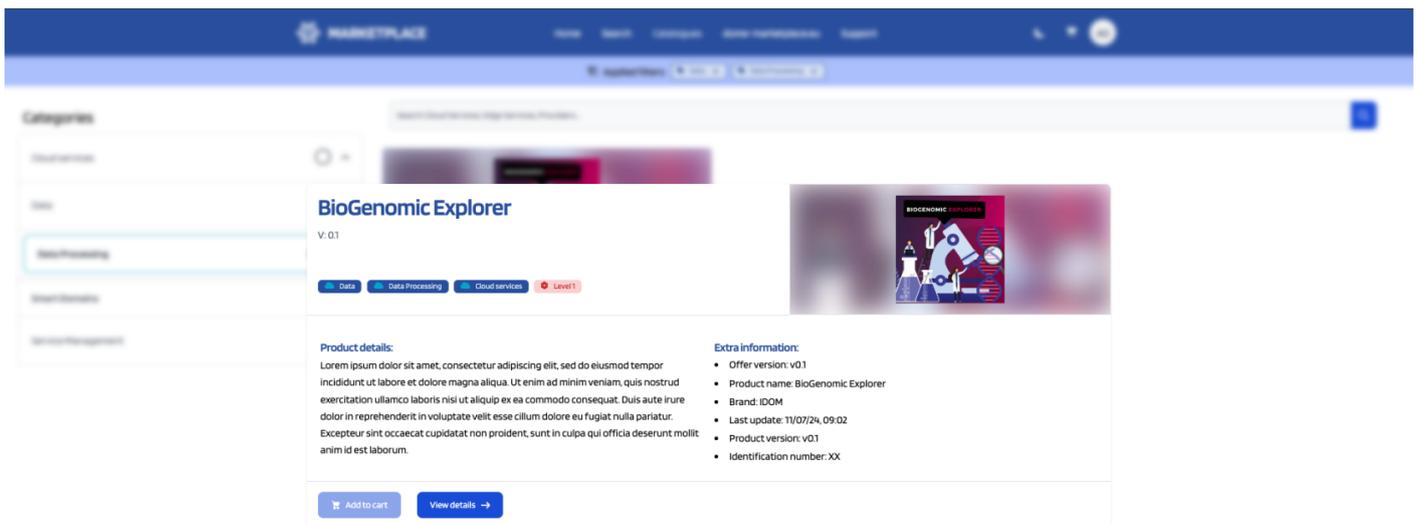

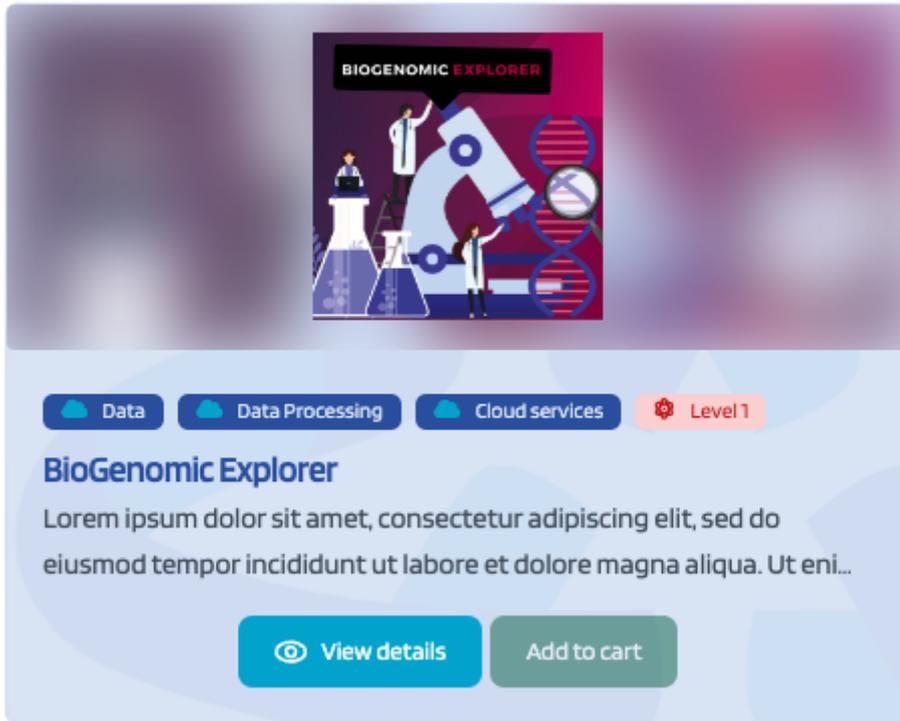

*Note: At this moment the purchase of offerings is disabled, so the Customers can just navigate over the marketplace.*

The screenshot shows the Marketplace search results page. The header includes the Marketplace logo, navigation links (Home, Search, Catalogues, dome-marketplace.eu, Support), and utility icons (moon, cart, AD). A search bar contains the text "Search Cloud Services, Edge Services, Providers...". On the left, a "Categories" dropdown menu is open, showing "Cloud services", "Data", "Smart Domains", and "Service Management". The main content area displays a grid of six product offerings, each with a thumbnail, category tags, title, description, and "View details" and "Add to cart" buttons. The offerings are: Virtual data center VMware, BioGenomic Explorer, Augmented Reality Suite 2.0, PaaSPort 4.0, QuantumCloud Pro, and Agricolus APIs Imagery. At the bottom right, there are links for "About", "Privacy Policy", "Cookies Policy", "Terms of Use", and "Contact".

Customers can search offerings by keyword using the provided search bar and filter the shown offerings by category using the categories dropdown and choosing the wanted ones.

The screenshot shows the Marketplace search results page with filters applied. The header is the same as the previous screenshot. The search bar is empty. The "Categories" dropdown menu is open, and "Data Processing" is selected. Below the search bar, there are two filter tags: "Data" and "Data Processing". The main content area displays a single product offering, "BioGenomic Explorer", which matches the selected filters. The offering card shows the product title, description, and "View details" and "Add to cart" buttons.

Customers can open a small review of the offer by clicking on *View Details*.

If you want to access offer's full information you can click on *View Details* in the shown modal or just clicking on the image of the offer's main card. This will lead you to the offer's detail view. In it is shown the general info about the offering and its included product, its compliance profile, the price plans of the offering, the characteristics of the product, the product's attachments, product's license and the existing relationships.

Additionally, customers can select a specific catalogue of offerings. In order to do that they should click the *Catalogues* button on the main website's header. In this view the existing catalogues will appear a list of cards, you can access to one specific catalogue by clicking on its card (e.g. click on "Computing Services" catalog). This will lead you to a search view with the same behavior as the main one explained before but filtered by the catalog shown on its breadcrumb.

# Checking marketplace's landing information

Customers can also check the information provided on the website's home page.

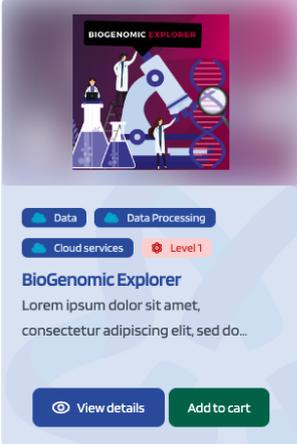

The first thing that appears on the home page is its banner which has two buttons in it: (1) *Learn More* button which leads to the project's website and (2) *Watch video* button which leads to a project's informative video.

Right under the banner, there is a search bar. Here you can write whatever keyword you want to search by and then when you click the search button this will lead you to the *Search* page filtering the offerings by that keyword.

The next section is the *How It Works* section which explains what customers and providers can do over the website.

Right under the last section is the *Featured offerings* section which shows a small portion of the available offerings on the website. (Note that this cards behave the same way as the ones on the *Search* page.)

The next thing on the Home page is the *Platform benefits* section which basically shows a list of benefits that this platform offers.

## Platform benefits

Your Gateway to Europe's Premier Digital Ecosystem

**Open** 

Navigate with confidence through transparent practices in service provisioning, pricing and operations.

**Interoperable** 

Unlock endless possibilities with our open ecosystem, designed for seamless collaboration and innovation.

**Trustworthy** 

Build on a foundation of trust with services vetted for security, reliability and compliance.

**Compliant** 

Stay ahead of the curve with services that adhere strictly to EU regulations and standards, for legal compliance and data protection.

**Sustainable** 

Embrace sustainability with services that prioritize energy efficiency and environmental responsibility.

**Transparent** 

Navigate with confidence through transparent practices in service provisioning, pricing and operations.

The last section of the Home page is the *Explore the Distributed Open Marketplace Project* section which shows some information about the project.

# Explore the Distributed Open Marketplace Project

Whether you're seeking in-depth reports, latest updates or upcoming events, everything you need to know is just a click away

## Events and Webinars

Join us at our next event or webinar to connect with fellow innovators, learn from industry leaders and discover new opportunities within the 'DOME' Project's ecosystem.

## Latest Updates and News

Stay informed with the latest developments, service enhancements and industry insights directly from the 'DOME' Project's website.
